DETAILED ACTION

Claims 1-8 are pending.

It is noted that according to PTO records, the International Bureau received on 11/15/1999 amended claims 1, 2, 7 and 8.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, partially drawn to a polynucleotide encoding the Adonis palaestina ϵ -cyclase of SEQ ID NO: 23.

Group II, claim(s) 1-6, partially drawn to a polynucleotide encoding the potato ϵ -cyclase of SEQ ID NO: 25.

Group III, claim(s) 1-6, partially drawn to a polynucleotide encoding the chimeric lettuce/potato ϵ -cyclase of SEQ ID NO: 26.

Group IV, claim(s) 7-8, partially drawn to the Adonis palaestina ϵ -cyclase of SEQ ID NO: 23.

Group V, claim(s) 7-8, partially drawn to the potato ϵ -cyclase of SEQ ID NO: 25.

Group VI, claim(s) 7-8, partially drawn to the chimeric lettuce/potato ϵ -cyclase of SEQ ID NO: 26.

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: while Groups I-III are drawn to polynucleotides

Art Unit: 1652

encoding ϵ -cyclases and Groups IV-VI are drawn to ϵ -cyclases, each of these Groups comprise a chemically unrelated structure capable of separate manufacture, use and effect. Groups I-III comprise compounds made out of nucleotides whereas Groups IV-VI comprise compounds made out of amino acids. In addition, each of the polynucleotides of Groups I-III and each of the polypeptides of Groups IV-VI comprise a different and unrelated nucleotide/amino acid sequence. The DNAs of Groups I-III have other uses besides encoding the proteins of Groups IV-VI such as hybridization probes or in gene therapy. The proteins of Groups IV-VI can be produced not only by recombinant DNA expression but also by chemical synthesis or by isolation from their natural sources. Since 37 CFR 1.475 does not provide for multiple products or methods within a single application, unity of invention is lacking with regard to Groups I-VI.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement can be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Applicants are requested to submit a clean copy of the pending claims (including amendments, if any) in future written communications to aid in the examination of this application.

Art Unit: 1652
